

Connected Cardiovascular Care
ASSOCIATES

Dear Patients,

Connected Cardiovascular Care Associates is closely monitoring developments in the spread of Coronavirus (COVID-19) and the Delta variant. In accordance with the updated CDC guidelines, everyone working, visiting, or receiving care at our offices must wear a face mask.

It is important to us that you have peace of mind when visiting our offices. Our goal is to support patients' medical needs while maintaining the safety of our patients and employees. Please know we take every precaution to keep our offices safe and virus-free by cleaning all treatment rooms between patients with medical-grade disinfectants. Patients are welcome to bring one visitor to appointments to limit the possible risk of exposure to our staff.

While there is no perfect replacement for an in-person visit, we are scheduling Telemedicine Visits for those patients who may not be able to come to the office or would like to reduce their risk during this time. Telemedicine Visits allow us to continue providing the best care possible while keeping your health and safety a top priority. By using a secure connection and your smartphone or computer, you can have a face-to-face visit with Dr. Das, Dr. Macpherson, or Vicki Skobel remotely, no matter where you are.

If you are sick or have a fever, we ask that you contact our office before coming in for your scheduled appointment. If you would like to schedule a Telemedicine Visit, reschedule your appointment, or have any questions, please call our office at (214) 814-1550.

We hope this information gives you peace of mind when visiting us. Thank you for your dedicated commitment to the safety of our patients, staff, each other, and our community.

Thank you,

Dr. Tony Das, Dr. Nicholas Macpherson, and the Connected Cardiovascular Care Team
